REPORT.

TO THE RIGHT HONOURABLE

JOHN SINCLAIR, M.P.,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 20*th March*, 1907.

SIR,

I HAVE now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1906, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Forty-second Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1905.

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL.

By James Craufurd Dunlop, M.D., F.R.C.P. Edin.

Sir,

I have the honour to submit the Fifty-second Annual Report regarding the Births, Deaths, and Marriages registered in Scotland. In it there are given facts concerning the births, deaths, and marriages registered in Scotland during the year ending 31st December 1906. Fuller information regarding those births, deaths, and marriages will be given in the Fifty-second Detailed Annual Report, which will be submitted at a later date.

I also submit the Forty-second Annual Report on Vaccination; in it is contained information regarding the administration of the Vaccination (Scotland) Act, 1863, more particularly regarding the vaccination of children born in Scotland during the year ending 31st December 1905.

I.—BIRTHS, DEATHS, and MARRIAGES in SCOTLAND.

POPULATION.

The population of Scotland at the middle of the year 1906 is estimated to be 4,726,070, of whom 2,305,850 are males and 2,420,220 females. This estimate is 49,467 more than the estimated population at the middle of the previous year, 1905, the increase of the male population being estimated at 25,765, and of the female population 23,702. These increases are based on the rates of increase observed in the last intercensal period, which rates are assumed to have continued since then. The natural increase of the population, the excess of births registered in Scotland between the middle of 1905 and the middle of 1906 over the deaths registered during that period, amounts to 57,100; the difference between that figure and the estimated increase of population may be taken as an indication of the effect of emigration and immigration on the population. The natural increase of the male population was 30,124, and of the female population 26,976.

Of the estimated population of Scotland, 2,143,052, or 45·35 per cent., are included in the estimated population of the Principal Town Registration Districts, which are those towns which at the time of the last census had a population of more than 30,000; 596,193, or 12·61 per cent., are in the Large Town Registration Districts, registration districts containing towns with populations of between 10,000 and 30,000; 953,517, or 20·17 per cent., in the Small Town Registration Districts, registration districts containing towns with populations of between 2000 and 10,000; 920,018, or 19·47 per cent., in the Mainland-Rural Districts, registration districts on the mainland not included in any of the three preceding groups; and 113,290, or 2·40 per cent., in the Insular-Rural Districts, embracing all the registration districts on the islands with the exception of a few included in the Small Town group. Compared to the estimated populations of the previous years, that of the Principal Town

Districts shows an increase of 48,136, that of the Large Town Registration Districts a diminution of 10,420, that of the Small Town Registration Districts an increase of 13,252, that of the Mainland-Rural Registration Districts a diminution of 866, and that of the Insular-Rural Registration Districts a diminution of 635. During the year there were several alterations of registration districts, the largest of them being the inclusion of Kinning Park in Glasgow. This change necessitated the addition

---

TABLE I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1906, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

of nearly 14,000 to the estimate of the Principal Town Districts, and a deduction of that amount from the estimated population of the Large Town Districts. It explains part of the large increase of the estimate of the Principal Town Districts and the decrease of the estimated population of the Large Town Registration Districts.

BIRTHS.

The total number of births registered in Scotland during 1906 was 131,920. These births are 539 more than those of the previous year and 619 more than the average number registered annually during the last ten years, but are 474 fewer than the average number of births registered during the last five years. Of these births 60,486 were registered in the Principal Town Districts, 18,432 in the Large Town Districts, 27,646 in the Small Town Districts, 23,049 in the Mainland-Rural Districts, and 2307 in the Insular-Rural Districts. Those registered in the Small Town Districts are 489 more than in the previous year, and in the Mainland-Rural Districts 140 more; but those in the Insular-Rural Districts were 56 fewer than in that year, those in the Large Town Districts 22 fewer, and those in the Principal Town Districts 12 fewer.

The birth-rate for the year is 27·91 per thousand, and is the lowest birth-rate recorded for Scotland. This is the first year in which the birth-rate has fallen below 28 per thousand. Previous to 1893 the birth-rate of Scotland was always over 30 per thousand, in 1894 it fell below 30 for the first time, from 1899 to 1903 it was between 29 and 30 per thousand, in 1904 and 1905 between 28 and 29 per thousand, and this year, for the first time, below 28 per thousand. This fall of the national birth-rate appears to be largely due to a fall of the birth-rate in the Principal Town Districts, for in them the birth-rate of the year was 28·2, which is 0·7 lower than that of the previous year. There is also a fall of the birth-rate in the Insular-Rural Districts, the rate in them being 20·4 which is 0·3 lower than that of the previous year. The birth-rate in the Large Town Districts was 30·9, which is 0·5 higher than that of the previous year; in the Small Town Districts 29·0, which is 0·1 higher than that of the previous year; and in the Mainland-Rural Districts 25·1, which is 0·2 higher than the rate of the previous year.

Of the 131,920 births registered during the year, 62,924 were registered in the South-Western Division of the counties; 17,980 in the South-Eastern; 17,609 in the East-Midland; 12,680 in the North-Eastern; 10,552 in the West-Midland; 4377 in the Southern; 3483 in the North-Western; and 2315 in the Northern. In the North-Western, East-Midland, West-Midland, and South-Western Divisions these numbers are more than in the previous year, in the remaining divisions they are less. The birth-rate for the year in the divisions of the counties ranged from 30·9 in the South-Western to 21·2 in the Northern. In the West-Midland it was 28·1; in the North-Eastern, 26·7; in the East-Midland, 25·8; in the South-Eastern, 25·8; in the Southern, 23·3; and in the North-Western, 21·6. Compared to the birth-rates of the previous year those of the North-Western, East-Midland, and West-Midland Divisions show an increase, while those of the remaining divisions show a decrease.

Illegitimate births registered during the year numbered 8895, and amounted to 6·74 per cent. of the total births. These births are 211 more

than in the previous year, and 195 more than the average number registered during the last ten years. The percentage of illegitimate births to the total is 0·13 higher than in the previous year, and 0·11 higher than the mean of the percentages of the last ten years. The illegitimate rate in the groups of registration districts ranged from 8·7 in the Mainland-Rural Districts to

5·3 in the Large Town Districts. In the Principal Town Districts it was 6·7, in the Small Town Districts 6·1, and in the Insular-Rural Districts 5·8. In the Principal Town, Small Town, and Insular-Rural Districts this rate was higher than in the previous year; in the Large Town and Mainland-Rural Districts it was lower than in that year. In the divisions of the counties the illegitimate rate ranged from 12·0 in the North-Eastern to 5·2 in the West-Midland. In the Southern it was 10·9; in the Northern, 7·1; in the East-Midland, 6·9; in the South-Eastern, 6·5; in the North-Western, 6·2; and in the South-Western, 5·7. In the Northern Division of the counties this rate is lower than it was in the previous year, in the Southern Division it is the same as in that year, in the other divisions it is higher than in that year.

In the counties the frequency of illegitimacy ranged from 15·7 per cent. in Elgin, 12·9 in Banff, 12·5 in Wigtown, and 12·0 in Aberdeen; to 3·8 in Linlithgow, 4·0 in Dumbarton, 4·2 in Ross and Cromarty, 4·2 in Renfrew, and 4·5 in Fife. In 7 counties the rate was 10 per cent. or over, in 19 counties the rate was between 5 and 10 per cent., in 7 counties the rate was less than 5 per cent. In 17 counties the rate of this year was

higher than that of 1905, in 2 counties it was the same, in 14 counties it was lower than in that year. The largest increases are noted in Kinross, where the rate is 5·3 higher than in 1905, Elgin, where it is 4·2 higher, and Selkirk, where it is 2·4 higher; and the greatest diminutions in Caithness, where the rate is 2·6 lower than in 1905, Kirkcudbright, where the rate is 1·0 less, and Linlithgow, where the rate is 0·9 less.

Of the 131,920 births registered during the year, 67,468 were of male children, and 64,452 of female children. The relative frequency of male and female births was thus in the proportion of 104·7 to 100. The birth-rate of male children per thousand of the estimated male population was 29·3, and of female children per thousand of the estimated female population 26·6. The male birth-rate for the year is the same as that for the previous year, but the female birth-rate is 0·4 lower than in that year.

The average number of births registered daily during the year was 361. In June the average daily number of births registered was 386; in April, 384; in May, 379; in March, 371; in January, 370; in October, 366; in July, 358; in February, 357; in August, 354; in November, 336; in December, 336; and in September, 335. In 1905, May was the most prolific month and November the least prolific.

DEATHS.

The number of deaths registered in Scotland during the year 1906 was 75,585, a number which is 1059 more than in the previous year, but 2081 fewer than the average number registered annually during the previous 10 years. Of the 75,585 deaths, 35,513, or 47·0 per cent., were registered in the Principal Town Districts; 10,052, or 13·3 per cent., in the Large Town Districts; 14,447, or 19·1 per cent., in the Small Town Districts; 13,858, or 18·3 per cent., in the Mainland-Rural Districts; and 1715, or 2·3 per cent., in the Insular-Rural Districts. The deaths in the Principal Town Districts are 529 more than in 1905; those in the Large Town Districts, 173 more; those in the Small Town Districts, 387 more; those in the Mainland-Rural Districts, 44 more; but those in the Insular-Rural Districts, 74 fewer.

The death-rate for the year per thousand of the estimated population is 15·99, a rate which is 0·05 higher than that of 1905, but is 1·43 lower than the mean of the death-rates of the previous 10 years, and is, with the exception of the death-rate of 1905, the lowest recorded for Scotland.

In the groups of registration districts the death-rate of the year ranged from 16·9 in the Large Town Districts to 15·1 in the Mainland-Rural Districts and in the Insular-Rural Districts. In the Principal Town Districts it was 16·6, and in the Small Town Districts 15·2. In the Principal Town and Insular-Rural Districts the death-rate is lower than that of the previous year; in the Large and Small Town Districts and in the Mainland-Rural Districts it is higher than in that year.

In the divisions of the counties the death-rate of the year ranged from 16·5 in the South-Western and Southern Divisions to 14·3 in the North-Eastern. In the West-Midland it was 16·3; in the Northern, 15·8; in the North-Western, 15·8; in the East-Midland, 15·8; and in the South-Eastern, 15·7. In the East-Midland, West-Midland, South-Eastern, and Southern the death-rate was higher than in 1905; but in the Northern, North-Western, North-Eastern, and South-Western it was lower than in that year.

Of the deaths registered during the year, 37,736 were of males and 37,849 of females, the proportion being 99·7 male deaths to each 100 female deaths. The death-rate of males per thousand of the estimated male population was 16·4, and of females per thousand of the female population 15·6; the former is 0·1 higher than in the previous year, the latter is the same as in that year.

The death-rate of the first quarter of the year was 17·6; of the second quarter, 16·4; of the third quarter, 13·8; and of the fourth quarter, 16·3. The death-rate of the third quarter is lower than the corresponding death-rates of those quarters in all previous years; that of the first quarter is lower than that of all previous years, 1896 excepted; and those of the second and fourth quarters, though slightly higher than those of the corresponding quarters of 1905, are lower than those of the corresponding quarters of all other previous years. The death-rate of the first quarter is 2·1 lower than the mean of the death-rates of the first quarter of the previous ten years; that of the second quarter is 1·2 lower than the mean of the death-rates of the previous ten second quarters; that of the third quarter, 1·6 lower than the corresponding mean of the last ten years; and that of the fourth quarter, 0·6 lower than that mean.

The average daily number of deaths registered in January was 230;

TABLE V.—Birth-, Death-, and Marriage-Rate per 1000 of the Population, Percentage of Illegitimate to the Total Births, and Proportion of Boys to Girls at Birth, in the Five Groups of Registration Districts in 1906.

in March, 227; in April, 226; in February, 225; in December, 224; in May, 218; in October, 206; in November, 201; in June, 193; in September, 186; in July, 176; and in August, 175. In 1905, deaths were most numerous in January and least so in September. The average daily number of deaths registered throughout the year was 207.

MARRIAGES.

Marriages registered in Scotland during the year 1906 numbered 33,123; they are 1880 more than in 1905, 1321 more than the average number registered during the previous ten years, and are the largest number registered in Scotland in any year since the institution of national registration. Of these marriages 18,089, or 54·6 per cent., were registered in the Principal Town Districts; 4372, or 13·2 per cent., in the Large Town Districts; 5958, or 18·0 per cent., in the Small Town Districts; 4346, or 13·1 per cent., in the Mainland-Rural Districts; and 358, or 1·1 per cent., in the Insular-Rural Districts. The marriages in the Principal Town Districts are 1478 more than in the previous year; those in the Large Town Districts 271 more than in that year; those in the Small Town Districts 131 more; and those in the Insular-Rural Districts 8 more; but those in the Mainland-Rural Districts are 8 fewer than in that year.

In the divisions of the counties the marriage-rate of the year ranged from 7·8 in the South-Western, and 7·5 in the South-Eastern, to 4·5 in the North-Western. In the East-Midland it was 6·6; in the Southern, 6·4; in the North-Eastern, 6·2; in the West-Midland, 5·8; and in the Northern, 4·6. The marriages registered in the South-Western Division of the counties numbered 15,811; in the South-Eastern, 5197; in the East-Midland, 4536; in the North-Eastern, 2958; in the West-Midland, 2176; in the Southern, 1210; in the North-Western, 732; and in the Northern, 503. In the North-Western Division of the counties the marriage-rate of the year is the same as that of 1905, in the North-Eastern Division it is lower, but in the remaining divisions it is higher than in that year.

The average number of marriages registered daily throughout the year was 91. That average in June was 160; in December, 143; in July, 139; in January, 122; in April, 99; in September, 78; in October, 72; in February, 63; in August, 63; in November, 62; in March, 57; and in May, 30. In the previous year marriages in June were also the most numerous and those in May the fewest.

II.—BIRTHS, DEATHS, AND MARRIAGES IN EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The following remarks refer to the births, deaths, and marriages in eight of the Principal Towns, namely:—Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth. The information on which the statements are founded is compiled from returns furnished weekly by the registrars of these towns. Similar information regarding the deaths in the other registration districts of Scotland is not yet available, but when procured will be incorporated in the Detailed Report which deals with the births deaths and marriages of the year. As fully 37 per cent. of the population of Scotland live in these eight towns, it is reasonable to assume that the causes of death observed in them fairly well indicate the causes of death prevalent throughout Scotland during the year.

BIRTHS IN THESE EIGHT TOWNS.

Births registered in these eight towns during the year numbered 49,176, and as the population of them is estimated to be 1,787,788, the annual birth-rate amounts to 27·5 per thousand. These births are 137 fewer than those registered in the eight towns in the previous year, and 433 fewer than the average number registered during the previous ten years; they are fewer than the number registered in any year since 1897. The birth-rate is 0·7 lower than that of 1905, and 2·7 lower than the mean

TABLE VII.—Births, Deaths, and Marriages, and their Proportion to the Population, in Eight Principal Towns of Scotland, during each of the Years 1855–1906.

of the birth-rates of the last ten years; it is the lowest birth-rate ever recorded for these towns. From 1856 to 1884 the birth-rate of these towns exceeded 35 per thousand, from 1885 to 1900 it was between 30 and 35, from 1901 to 1903 it was between 29 and 30, in 1904 and 1905 it was between 28 and 29, and now, for the first time, has fallen below 28 per thousand.

The highest birth-rate for the year was in Greenock, 32·2, and the lowest in Perth, 22·3. In Glasgow it was 29·4; in Leith, 29·0; in Aberdeen, 27·5; in Dundee, 27·4; in Paisley, 26·2; and in Edinburgh, 22·4. In Greenock the birth-rate is 1·7 higher than in the previous year, but in the remaining seven towns it is lower. In Glasgow it is 0·6 less; in Edinburgh, 0·6 less; in Dundee, 0·6 less; in Aberdeen, 1·7 less; in Paisley, 1·5 less; in Leith, 0·7 less; and in Perth, 1·7 less.

Of the 49,176 births registered in these eight towns during the year, 3560, or 7·2 per cent., were illegitimate. This rate of illegitimacy is 0·1 higher than that of the previous year, and 0·3 higher than the mean of those rates during the last ten years. The illegitimate rate for the year was highest in Aberdeen, 9·6, and lowest in Leith, 4·3. In Perth it was 8·6; in Dundee, 8·4; in Edinburgh, 7·9; in Glasgow, 7·0; in Greenock, 5·2; and in Paisley, 4·7. In Dundee and Leith this rate was lower than it was in 1905, but in Glasgow, Edinburgh, Aberdeen, Paisley, Greenock, and Perth it was higher than in that year.

The estimated number of unmarried and widowed women of child-bearing age in these towns is 275,434, the illegitimate births numbered 3560, consequently those births amounted to a birth-rate of 12·9 per thousand such women, a rate similar to that of the previous year. This rate in Aberdeen was 17·6; in Glasgow, 14·5; in Dundee, 13·2; in Greenock, 12·8; in Perth, 11·2; in Leith, 10·1; in Edinburgh, 9·7; and in Paisley, 7·8.

DEATHS IN THESE EIGHT TOWNS.

Deaths registered in these eight towns during the year 1906 numbered 30,573, a number which is 606 more than in the previous year, but 1176 fewer than the average number registered during the previous ten years. The death-rate amounts to 17·1 per thousand, a death-rate which is the same as that of the previous year, but 2·3 less than the mean of the death-rates of the previous ten years, and less than that of any year, 1905 excepted, since the institution of national registration.

Of these towns Dundee had the highest death-rate of the year, 19·6, and Leith the lowest, 14·8. In Greenock the death-rate was 17·9; in Glasgow, 17·8; in Perth, 16·3; in Edinburgh, 16·0; in Paisley, 15·6; and in Aberdeen, 15·1. In Dundee and Leith the death-rate was higher than in 1905, in the remaining six towns it was lower. In each of these towns the death-rate was lower than the mean of the death-rates of the previous ten years.

When the death-rates of these towns are corrected for the age and sex distribution of their populations,* it is found that the highest corrected death-rate of the year was in Dundee, 20·7, and the lowest in Aberdeen, 15·0. In Glasgow the corrected death-rate was 19·7; in Greenock, 18·8; in Edinburgh, 16·7; in Perth, 16·4; in Paisley, 16·3; and in Leith, 15·7.

*For factors for correction see Table 19 of the Fiftieth Detailed Annual Report.

Deaths of children in these towns of less than one year old numbered 6395, and the infantile mortality-rate in them amounted to 130 per thousand births. These deaths are 20 more than in 1905, and this rate is 1 more than in that year. The infantile mortality-rate for the year was highest in Dundee, 170; and lowest in Perth, 99. In Glasgow it was 131; in Aberdeen, 128; in Greenock, 127; in Edinburgh, 118; in Paisley, 114; and in Leith, 114. This rate in Glasgow was the same as in 1905; in Dundee, Leith, and Greenock it was higher than in that year; but in Edinburgh, Aberdeen, Paisley, and Perth it was lower than in that year.

Deaths of children of less than five years old numbered 10,302, and amount to a death-rate of 49·9 per thousand of the estimated population at those ages. The number of these deaths is 177 less than in the previous year, and the death-rate of the age-period 2·0 less than in that

TABLE VIII.—Births, Deaths, and Marriages registered during 1906, and their Proportion to the Estimated Population, in each of the following Principal Towns of Scotland; Estimated Number of Unmarried Women between 15 and 45 years of age; and the Illegitimate Births, and their Proportion to the Total Births, and to the Number of Possible Mothers.

year. The death-rate of this age-period for the year was highest in Dundee, 64·2; and lowest in Perth, 30·1. In Glasgow it was 54·4; in Greenock, 51·4; in Edinburgh, 42·1; in Aberdeen, 41·2; in Paisley, 40·3; and in Leith, 38·6. The deaths of this age-period constitute 33·7 per cent. of the total deaths in these towns during the year. This percentage ranged from 36·7 in Dundee and 36·6 in Glasgow, to 18·7 in Perth and 26·1 in Edinburgh.

Deaths from the principal epidemic diseases, namely, smallpox, measles, scarlet fever, hooping-cough, diphtheria, and "fevers," numbered 2267, and the annual death-rate from these causes amounted to 128 per 100,000. These deaths are 403 fewer than in the previous year, and the death-rate from them is 25 lower. The death-rate from these causes ranged from 159 in Glasgow to 75 in Greenock. In Dundee it was 128; in Aberdeen, 115; in Paisley, 100; in Leith, 92; in Edinburgh, 90; and in Perth, 79.

There were no deaths from small-pox registered in these towns during

TABLE X.—Death-rate of Children under Five Years of Age in Eight of the Principal Towns of Scotland in 1906.

Towns.	Estimated Number of Living Children under 5 years in 1906.	Deaths under 5 years of age.		
		Number.	Rate per 1000 Children under five.	Percentage of Total Deaths.
Glasgow	100,091	5,447	54·4	36·6
Edinburgh	33,881	1,425	42·1	26·1
Dundee	18,492	1,188	64·2	36·7

Perth	3,491	105	30·1	18·7

TABLE XA.—Infantile mortality in Eight of the Principal Towns of Scotland during the Year 1906.

Towns.	Births in 1906.	Deaths of Infants under 1 year of age.		
		Number.	Rate per 1000 Births.	Percentage of Total Deaths.
Glasgow	24,560	3,223	131	21·6
Edinburgh	7,651	900	118	16·5
Dundee	4,522	771	170	23·8
Aberdeen	4,711	602	128	23·4
Paisley	2,287	260	114	19·2
Leith	2,395	273	114	22·3
Greenock	2,279	290	127	22·9
Perth	771	76	99	13·5

the year; there has been only one such death registered in them during the last two years.

Deaths from measles numbered 740, the death-rate from that disease being 42 per 100,000. Of the principal epidemic diseases this was the most fatal during the year. The death-rate from it ranged from 48 per 100,000 in Glasgow to 6 in Perth. In Paisley it was 46; in Aberdeen, 43; in Dundee, 40; in Edinburgh, 38; in Leith, 34; and in Greenock, 13.

Scarlet fever was the ascribed cause of 132 deaths in these towns during the year, the death-rate from it being 7 per 100,000. These deaths are 30 more than in the previous year, and the death-rate 1 higher than in that year. The death-rate from scarlet fever was 12 per 100,000 in Dundee; 11 in Edinburgh; 11 in Leith; 9 in Greenock; 6 in Glasgow; 6 in Paisley; 6 in Perth; and 4 in Aberdeen.

Deaths attributed to influenza numbered 170; these are 64 fewer than in the previous year. The death-rate from this cause was 10 per 100,000, a rate which ranged from 23 in Perth and 15 in Aberdeen, to 1 in Leith and 4 in Dundee.

Deaths from hooping-cough numbered 622, and the death-rate from that disease was 35 per 100,000. These deaths are 401 fewer than in 1905,

TABLE XI.—Deaths from different Diseases in each of Eight of the Principal Towns of Scotland in 1906.

* Smallpox, Measles, Scarlet Fever, Influenza, Hooping-cough, Diphtheria, and "Fevers."

and the death-rate from it is 24 lower. The death-rate from hooping-cough in Glasgow was 49 per 100,000; in Dundee, 39; in Aberdeen, 39; in Greenock, 26; in Leith, 25; in Edinburgh, 11; in Paisley, 9; and in Perth, 6.

Diphtheria was the ascribed cause of 299 deaths, these being equivalent to a death-rate of 17 per 100,000, These deaths are 48 more than in the previous year, and the death-rate from it is 3 higher. The death-rate from diphtheria ranged from 24 in Dundee and 23 in Perth, to 11 in Aberdeen and 13 in Greenock. In Glasgow it was 18; in Paisley, 16; in Leith, 15; and in Edinburgh, 15.

Deaths from fevers included 3 from typhus fever, of which 2 were registered in Glasgow and 1 in Dundee; 141 from enteric fever, of which 90 were registered in Glasgow; 156 from cerebro-spinal fever, of which 147 were registered in Glasgow, 4 in Paisley, 3 in Edinburgh, and 1 each in Dundee and Aberdeen.

The death-rate from enteric fever amounted to 8 per 100,000. This rate is the same as that of 1905. It ranged from 15 in Perth and 11 in Glasgow, to 2 in Aberdeen and 3 in Edinburgh. In Greenock it was 10; in Paisley, 9; in Dundee, 8; and in Leith, 5.

TABLE XII.—Proportion of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1906, allowing for Causes not specified.

The death-rate from cerebro-spinal fever for the eight towns combined was 9 per 100,000. It amounted to 18 per 100,000 in Glasgow; 5 in Paisley; and 1 in Edinburgh, Dundee, and Aberdeen.

Deaths certified as due to diarrhœa or to infective enteritis numbered 684, the equivalent death-rate being 39 per 100,000. This rate ranged from 75 in Dundee to 3 in Perth. In Greenock it was 50; in Paisley, 40; in Glasgow, 39; in Leith, 38; in Edinburgh, 31; and in Aberdeen, 19.

Deaths certified as due to diarrhœas, infective enteritis, enteritis, and to gastro-enteritis combined numbered 1436, which is 314 more than in the previous year, and equivalent to an annual death-rate of 81 per 100,000. This combined death-rate was highest in Dundee, 113, and lowest in Perth, 44. In Greenock it was 106; in Glasgow, 91; in Edinburgh, 57; in Leith, 74; in Paisley, 70; and in Aberdeen, 53.

To tubercle 4042 deaths were ascribed, the death-rate from that cause amounting to 228 per 100,000. These deaths are 84 more than in the previous year, but the death-rate is the same as in that year. The death-rate from tuberculous diseases ranged from 268 in Dundee to 184 in Leith. In Perth it was 263; in Greenock, 256; in Glasgow, 243; in Paisley, 214; in Edinburgh, 195; and in Aberdeen, 190. In Glasgow, Dundee, Aberdeen, Greenock, and Perth this rate was higher than in 1905; in Edinburgh, Paisley, and Leith it was lower than in that year. Of the 4042 deaths ascribed to tuberculous disease, 2557 were attributed to phthisis. This number is 17 fewer than in the previous year, and is equivalent to a death-rate of 144 per 100,000, a rate which is 4 lower than that of the previous year. The death-rate from phthisis ranged from 179 in Perth, and 169 in Dundee, to 122 in Aberdeen and 119 in Edinburgh. In Glasgow it was 156; in Greenock, 132; in Paisley, 128; and in Leith, 127. Among the deaths from tubercle there were 617 from tuberculous meningitis; 330 from tuberculous peritonitis; 112 from tabes mesenterica; 1 from lupus; and 425 from general and other tuberculoses.

Deaths ascribed to malignant disease numbered 1769, the death-rate from that cause amounting to 100 per 100,000. These deaths are 144 more than those of the previous year, and the death-rate 7 higher than in that year. The death-rate from malignant disease ranged from 129 in Perth and 121 in Edinburgh, to 83 in Paisley and 88 in Greenock. Of the 1769 deaths ascribed to malignant disease, 906 were attributed to carcinoma, 86 to sarcoma, and 777 to cancer not otherwise defined.

Pneumonia was the ascribed cause of 3037 deaths, the death-rate from it being 171 per 100,000. These deaths are 24 more than in 1905, but the death-rate is 2 lower. The death-rate from pneumonia was highest in Glasgow, 198, and lowest in Perth, 79. In Greenock it was 185; in Dundee, 170; in Edinburgh, 158; in Leith, 147; in Aberdeen, 119; and in Paisley, 116.

Bronchitis was the ascribed cause of 2175 deaths, the death-rate from it being 122 per 100,000. These deaths are 13 more than in the previous year, but the death-rate from it is 2 lower. This death-rate ranged from 193 in Dundee to 76 in Perth. In Greenock it was 144; in Glasgow, 128; in Paisley, 126; in Aberdeen, 108; in Leith, 95; and in Edinburgh, 87.

Deaths from puerperal septic diseases and from diseases and accidents of pregnancy and childbirth numbered 256, a number which is 2 fewer than in 1905. These deaths are equivalent to a death-rate from these causes amounting to 52 per 10,000 births, a rate which is the same as that of 1905.

This rate was highest in Paisley, 66; and lowest in Dundee, 27. In Glasgow it was 59; in Leith, 58; in Aberdeen, 53; in Greenock, 53; in Perth, 52; and in Edinburgh, 38.

Deaths from ill-defined or not specified causes numbered 1824; they are 45 fewer than in the previous year, and 603 fewer than in 1904. These deaths include 687 from atrophy and debility, 860 from old age, 15 from dropsy, 24 from tumour, 32 from abscess, 10 from hæmorrhage, 31 from sudden death with cause unascertained, 3 from other ill-defined causes, and 162 in which the causes were not specified.

Deaths from violent causes numbered 1290; of them 9 were homicidal, 97 suicidal, and 1184 accidental, Homicidal deaths are 2 fewer than in the previous year, suicidal deaths 8 more than in that year, and accidental deaths 15 more. Among the accidental deaths in these towns there were 206 from burning, 120 from drowning, 61 from overlaying, 89 from other suffocations, 57 from falls, 57 from poisons, and 33 from accidents with vehicles and horses.

During the year the deaths of 117 persons aged 90 years or more were recorded. Of them 32 were men and 85 women. The oldest of them were a retired rope-spinner, aged 102, and two widows, the one aged 101 and the other 100.

MARRIAGES IN THE EIGHT TOWNS.

Marriages registered in these eight towns during 1906 numbered 15,524. The equivalent marriage-rate amounts to 8·7 per thousand. The marriages of the year are 1070 more than those of 1905, and 720 more than the average number registered during the previous ten years. The marriage-rate is 0.4 higher than that of 1905, but 0.3 lower than the mean of the marriage-rates of the previous ten years. The marriage-rate of the year was highest in Glasgow, 9·1, and lowest in Paisley, 7·1. In Edinburgh it was 8·9; in Greenock, 8·7; in Dundee, 8·5; in Aberdeen, 8·0; in Perth, 7·6; and in Leith, 7·2. In Aberdeen and Perth this rate is lower than it was in 1905, in the remainder of these towns it is higher than in that year.

III.—WEATHER AND ITS INFLUENCE ON MORTALITY.

The remarks regarding weather made in this section of the report are based on notes made by Dr. Buchan of the Scottish Meteorological Society, and which were published in the Monthly and Quarterly Reports of the Registrar-General.

The year 1906 was characterised by a mean temperature slightly higher than the average mean temperature of the last twenty years, and by a rainfall higher than the average rainfall of that period. The average mean temperature of the last twenty years was 46°·2, that of this year was 46°·4, or 0°·2 higher than that average. The annual average rainfall of the last twenty years was 38·82 inches; the rainfall of this year was 42·39 inches, which is 3·57 inches more than the average.

Compared to the mean temperature and the rainfall of the previous year, 1905, the mean temperature of this year is 0°·3 lower, and the rainfall 6·71 inches higher.

These weather influences—a slightly high temperature and a high rainfall—have been accompanied by a low death-rate. The differences observed between this year and the previous year—a slightly lower mean temperature and a decidedly higher rainfall—have been accompanied by practically no change of mortality, for the death-rate of this year is very nearly exactly the same as that of the previous year, and by comparing the deaths in the eight towns with those in them during the previous year differences found are slight. Deaths from measles, hooping-cough, and influenza were less numerous in this year than in the previous year, while those from scarlet fever and diphtheria were more numerous; deaths from pneumonia show a slight increase, while those from bronchitis show a slight diminution.

As is usually the case, deaths from diseases of the respiratory system, including pneumonia, were more frequent in the colder months of the year, reaching a maximum in the month of April, those from phthisis were most numerous in winter and spring, reaching a maximum in May, while diarrhœal diseases were most numerous in August, September, and October.

The only epidemic observed during the year which may be attributable to weather influences was in September, when diarrhœas were very prevalent, that epidemic being coincident with a spell of hot dry weather. A marked fall of temperature which occurred in the second week of December was followed by a marked increase of deaths of persons of over sixty years old, and by an increase of deaths from diseases of the respiratory system; the former, which in October and November averaged 674 per month, in December amounted

to 808; the latter, which in October and November averaged 464, in December numbered 618.

The following are notes of the weather of each month of the year:—

TABLE XIII.—Monthly Mortality and Mean Temperature in Scotland during 1906 compared with the Mean of the Ten Years 1891–1900.

MONTHS.	YEAR 1906.			1891-1900.	
	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per annum or 1000 per month.	Monthly Proportion of Deaths.	Mean Temperature.
January	39°·5	7,143	1,134	1,163	36°·8
February	35°·7	6,310	1,002	1,087	37°·4

April	43°·3	6,766	1,074	1,043	44°·7
May	46°·9	6,752	1,072	1,005	48°·8
June	55°·8	5,788	919	929	55°·2
July	56°·0	5,445	864	892	57°·3
August	57°·5	5,410	859	898	57°·1
September	54°·5	5,584	887	854	53°·0
October	48°·0	6,379	1,013	907	45°·8
November	44°·6	6,023	956	982	42°·4
December	37° 0	6,950	1,103	1,085	38°·7
YEAR	46°·4	75,585	12,000	12,000	46°·4

January was characterised by a low mean barometric pressure; a high mean temperature, with a low mean daily range; a rather high mean rainfall, with two more than the average number of days with rain; and an excess of strong winds from the W. and S.W.

TABLE XIV.—Meteorology of Scotland for 1906, deduced from Observations made at 59 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1906.

February was characterised by a very low mean barometric pressure; a low mean temperature, with a high mean daily range; a low mean rainfall, with the average number of days with rain; and an excess of moderate winds from N.W. and N.

March was characterised by a high mean barometric pressure; a rather low mean temperature, with a slightly high mean daily range; a rather high mean rainfall, with two less than the average number of days with rain; and a large excess of winds of average force from a northerly quarter.

April was characterised by a high barometric pressure; a temperature slightly below the average, but with a large mean daily range; a very low rainfall; and fewer easterly winds than usual.

May was characterised by a very low barometric pressure; a low temperature, with a very low mean daily range; an extremely high rainfall, with a large number of days with rain; and winds of about average direction and force.

June was characterised by a high barometric pressure; a high mean temperature, with a low mean daily range; a low mean rainfall, with fewer days with rain than usual; and a moderate wind force, with a slight deficiency of winds from between S.E. and S.W.

July was characterised by a slightly high mean pressure; a somewhat low mean temperature, with a large daily range; a low mean rainfall; and rather more frequent winds than usual from S.E. and S.W.

August was characterised by a slightly high mean pressure; a high mean temperature, with an average daily range; a very high mean rainfall; and an excess of winds of moderate force from S. and S.W.

TABLE XV.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Diseases in Eight of the Principal Towns of Scotland, during each Month of the Year 1906.

September was characterised by an exceptionally high mean pressure; a high mean temperature, with a notably high daily range; a low mean rainfall, with a small number of rainy days; a wind force much below the average, with a trifling excess of winds from S.W.

October was characterised by a low mean pressure; a high mean temperature, with a normal mean daily range; a very high mean rainfall, with a large number of days with rain; a considerable excess of winds from between S.E. and S.W.

November was characterised by a somewhat low mean pressure; a very

FORTY-SECOND ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND IN 1905.

The number of living children born in Scotland during the year ending 31st December 1905, was 131,453. Of these, 111,164 have been reported to the registrars as having been successfully vaccinated; 2831 as having had their vaccination postponed under medical certificate; 1276 as being insusceptible; 12,168 as having died before vaccination; while 4014 were removed from the district before vaccination, or were otherwise unaccounted for.

TABLE XIX.—VACCINATIONS in SCOTLAND, 1895–1905, and Proportion to the Births each Year.

Successful vaccinations numbered 111,164; they amount to 84·6 per cent. of the total children born during the year, and 93·2 per cent. of those children who survived to the time for vaccination. The former percentage is slightly more than the corresponding percentage for the previous ten years; the latter is slightly lower than its corresponding percentage for the previous ten years.

The number reported as dead before vaccination amounts to 12,168, or 9·3 per cent. of the total born; they are 783 fewer than those dying before vaccination in the previous year, 1904; and the percentage they form of the total deaths is 0·5 less than in that year. These children number 853 fewer than the average number dying before vaccination during the last ten years, and the percentage they form of the total is 0·6 less than the average of those years.

The number of children whose vaccination was postponed for reasons of ill-health was 2831; these are 11 fewer than in the previous year, but 36 more than the average number during the last ten years. These children are 2·15 per cent. of the total born. In the previous year they were 2·14 per cent. of the total, and the average percentage of the last ten years was 2·14. These children whose vaccination was postponed by medical certificate amounted to 2·4 per cent. of the total children surviving at the time of vaccination, a percentage which is the same as that of the previous year and the average percentage of the last ten years.

The total number reported as insusceptible was 1276. Of these, 511 were reported to be insusceptible by reason of constitutional insusceptibility; 1 by reason of having had smallpox; and 764 by reason of having been previously vaccinated.

TABLE XX.—VACCINATIONS in SCOTLAND, 1895–1905, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

1905	**Percentage**	**93·192**	**2·373**	**0·428**	**0·001**	**0·641**	**3·365**	**100,000**

The number of cases reported as constitutionally insusceptible, 511, is 39 fewer than in the previous year, and 48 fewer than the average number during the last ten years. They amount to 0·39 per cent. of the total children born, and to 0·43 per cent. of children surviving at the time of vaccination. Both these percentages are smaller than those of the previous year and of the averages of the last ten years. These insusceptibles amount to 1 in each 257 born. In the eight Principal Towns this rate ranged from 1 in 89 in Dundee to 1 in 555 in Aberdeen. In Paisley it was 1 in 158; in Edinburgh 1 in 161; in Greenock 1 in 165; in Leith 1 in 187; in Glasgow 1 in 223; and in Perth 1 in 410. High rates of constitutional insusceptibility are reported from the Island of Coll, where 1 in 2 is stated to be insusceptible; in Kilmun, where 1 in 10 is reported to be insusceptible; in East Peterculter (landward), 1 in 12; in Tulliallan, 1 in 28; in Gourock, 1 in 28; and in North Harris, 1 in 29. High rates of insusceptibility have been previously noted in North Harris, Kilmun, and Gourock. As a contrast to these it may be noted that during the year there was not a single constitutionally insusceptible case reported in the counties of Sutherland, Nairn, Kincardine, Kinross, Berwick, Selkirk, and Dumfries.

The number reported as insusceptible from previous vaccination was 764. If these be added to the total of successful vaccinations it brings that total up to 111,928, which amounts to 85 per cent. of the total children born, and 94 per cent. of those surviving at the time of vaccination.

The number of children reported to have been removed from the district of registration, or to be otherwise unaccounted for, is 4014; this number is 79 more than in the previous year, and 355 more than the average number during the last ten years. These children form 3·05 per cent. of the total born, a rate which is 0·08 higher than in the previous year, and 0·25 higher than the mean of the rates of the last ten years.

In Table XXIA there is given a recapitulation of the facts connected with the administration of the Vaccination Act since that Act came into force, 1863. It shows the percentage of children successfully vaccinated in terms of the Act, along with those insusceptible of statutory vaccination by reason of previous vaccination, the number of children whose vaccination was postponed by reason of ill-health, the number constitutionally

* For 1905 and 1906 the Smallpox Deaths for Scotland are not yet available; the numbers given are those which occurred in Eight of the Principal Towns only.

insusceptible, and the number about whom no information is available. The Table also shows year by year and in age groups the deaths occurring in Scotland from small-pox, from cow-pox, and from the effects of vaccination. The latter are given since 1883 only, as previous to that they were not separately stated in the classification.

TABLE XXIA.—Showing the percentage of Children successfully vaccinated, etc., in Scotland in each year since the Vaccination Act came into operation; also the number of deaths from Smallpox in each year since the Registration Act came into operation; and the number of deaths from Cowpox and Effects of Vaccination from 1883–1904.

* Including such as were certified as Insusceptible of Vaccine Disease "on the ground of previous successful vaccination", the children having been vaccinated by persons unauthorised to grant certificates.
† At the end of the year following that of registration of birth.

The number of children successfully vaccinated in Scotland has each year since the passing of the Act formed a large proportion of the total children surviving at the age of compulsory vaccination; that proportion has never been below 93·4 per cent., and has been as high as 96·9 per cent. In the first twenty years of compulsory vaccination that proportion was always more than 96 per cent., the first year, 1863, being a slight exception; but since 1883 the proportion has shown a gradual though small diminution; in 1884 it fell for the first time below 96, in 1887 below 95, and in 1898 below 94. During the last ten years it has on six occasions been between 93 and 94 per cent., and on four occasions between 94 and 95 per cent.

Postponement on the grounds of ill-health has generally been an increasing quantity since the commencement. During the first nine years the proportion these formed of the total was always less than 1 per cent.; from 1873 to 1885, with the exception of 1876, it was between 1 and 2 per cent., while since 1886 it has always exceeded 2 per cent., reaching a maximum in 1898, when it was 2·7 per cent.

Constitutional insusceptibility as a reason for non-vaccination has been the certified cause in a very small proportion of cases; in two years only has the percentage of cases so certified exceeded 0·5 per cent., those years being 1864, when the percentage was 0.8, and 1901, when it was 0·9. In five years the percentage was 0·5, in eight years it was 0·4, in four years it was 0·3, in twenty-one years it was 0·2, and in two years it was 0·1.

The effects of vaccination as shown by the diminution of the prevalence of small-pox in Scotland since the introduction of the Act is also shown in the Table. In the nine years before the introduction of the Act deaths from small-pox averaged 978 annually; during the first seven years of vaccination they averaged 373, during the decade 1871 to 1880 they averaged 644, from 1881 to 1890 they averaged 14, from 1891 to 1900 they averaged 32, and from 1901 to 1904 they averaged 146. Not only has there been a great reduction in the number of deaths from small-pox, but there has been a marked alteration in the age distribution of those deaths, that apparently being due to the greater protection given by compulsory vaccination to children than to adults. The number of children of under five dying annually from small-pox previous to the Act coming into force was 690; during the first seven years of the Act that number fell to

---

TABLE XXII.—Smallpox Deaths in Eight of the Principal Towns of Scotland at different Ages in 1906, also during the Ten Years 1895–1904, 1885–1894, 1875–1884, and 1865–1874, compared with those in the same towns for the Ten Years before the Vaccination Act came into operation, viz., 1855–1864.

AGES.	Smallpox Deaths, 1906.		Smallpox Deaths, 1895–1904.		Smallpox Deaths, 1885–1894.		Smallpox Deaths, 1875–1884.		Smallpox Deaths, 1865–1874.		Smallpox Deaths, 1855–1864.	
	Number.	Percentage at each age.	Number.	Percentage at each age.	Number.	Percentage at each age.	Number.	Percentage at each age.	Number.	Percentage at each age.	Number.	Percentage at each age.

Total .	..	..	463	100·00	186	100·00	104	100·00	3657	100·00	5415	100·00

209, between 1871 and 1880 it was 144, between 1881 and 1890 it was 2, between 1891 and 1900 it was 5, and between 1901 and 1904 it was 22. Before the passing of the Act the number of children aged from five to twenty dying annually from small-pox was 140; during the first seven years of the Act it was 67, in the decade 1871 to 1880 it was 192, in the decade 1881 to 1890 it was 2, in the decade 1891 to 1900 it was 3, and since 1901 it was 6. Of the total deaths from small-pox before compulsory vaccination, 85 per cent. were of persons of under twenty; in the first seven years of compulsory vaccination that proportion fell to 74, between 1871 and 1880 it was 52 per cent., between 1881 and 1890 it was 28 per cent., between 1891 and 1900 it was 25 per cent., and from 1901 to 1904 it was 19 per cent. From such figures the greater protection given by vaccination in younger age periods is very evident. Had there been no such protection during these later years it is reasonable to assume that the deaths from small-pox under twenty would bear the same proportion to those over twenty as they did prior to the introduction of compulsory vaccination, and if so in these later years, when deaths of adults averaged 118 annually, deaths under twenty would have been about 780 instead of 28, as was the case; the difference, 752 deaths per annum, must be credited to vaccination.

The number of accidents from vaccination, deaths from cow-pox and from the effects of vaccination, to be seen in the Table, is so small that it shows the safety of vaccination in childhood, and at what small risk the benefits of compulsory vaccination have been procured in Scotland. These deaths during the twenty-two years for which figures are available amounted to only 42, or an average of less than 2 a year; during the last ten years they have amounted to only 8, or an average of less than 1 a year; and during the last six years they have amounted to only 2, or 1 in three years. One death from the effects of vaccination in three years in Scotland is equivalent to one death in 336,000 children vaccinated, a risk so utterly small as to be completely insignificant.

I have the honour to be,

Sir,

Your most obedient Servant,

JAMES C. DUNLOP.

19*th February*, 1907.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus—CARLUKE. An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish. The component parts of these Districts will be found on page 57. A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

‡ Vaccination Return not received.

APPENDIX

VACCINATIONS, 1905.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I.—NORTHERN DIVISION.

1. Shetland.

6 (2). North Yell.—Excessively severe weather in the last quarter prevented weak children from being vaccinated.

II. NORTH-WESTERN DIVISION.

5. Ross and Cromarty.

Mainland.

66 (2). South Gairloch.—The three "unaccounted for" have been vaccinated, though certificates have not yet been received.

Insular.

88. Stornoway.—A special effort was made this year to have the list of defaulters reduced, and the result has been very satisfactory. Of the five cases in column 7, three have left the parish (one temporarily), one is believed to have been vaccinated though no certificate has yet been received, and the other is a delicate child, in whose case a certificate will soon be forthcoming.

6. Inverness.

Insular.

110 (1). Duirinish.—Owing to the change of vaccinators, the number of cases "unaccounted for" is unusually large.

118 (1). Benbecula.—Of the two cases entered in column 7, it is understood that one of the children has left the district, and that the other has been successfully vaccinated, though no certificate has yet been received.

III. NORTH-EASTERN DIVISION.

9. Banff.

162. Mortlach.—The cases entered in column 7 are being dealt with by the Parish Council.

10. Aberdeen.

168 (1). St. Nicholas.—The large number entered as "insusceptible on the ground of previous successful vaccination" are cases which were reported to the Inspector of Poor, who found that they had been vaccinated by different medical men in Aberdeen though the latter had failed to furnish certificates. The Inspector of Poor had those cases submitted to his own medical officers, who granted "insusceptible" certificates.

168 (2). St. Machar.—Of the fifty cases entered in column 7, in twenty-two, postponements to dates prior to 31st December 1906 had been granted, in twelve, the children had left the district and had not been traced, twelve were under the consideration of the Parish Council, and in four cases the parents had been convicted of refusal to have their children vaccinated.

173. Auchterless.—The case entered in column 7 has been reported to the Parish Council.

IV. EAST-MIDLAND DIVISION.

14. Fife.

406. Auchtermuchty.—The case entered in column 7 is that of a child of the vagrant class, whom the Inspector of Poor has been unable to trace.

15. Kinross.

462. Kinross.—The serious illness of the Inspector of Poor is responsible for the number of cases "unaccounted for."

V. WEST-MIDLAND DIVISION.

18. Dumbarton.

501. Old Kilpatrick.—A large number of the cases in column 7 are still in the hands of the Inspector of Poor.

19. ARGYLL.

Insular.

545. KINLOCHSPELVIE. — Three cases "unaccounted for." This district is one of those in which the provisions of the Vaccination Act (referring to the time within which certificates of vaccination must be forwarded) have been modified by the Local Government Board.

551 (2). COLL.—The number entered in column 3 is abnormally high, amounting to 50 per cent. Perhaps the vaccine matter used is inferior in quality, and not very fresh.

VI. SOUTH-WESTERN DIVISION.

21. RENFREW.

559*b*. BRIDGE-OF-WEIR.—In one case a prosecution and fine followed refusal to vaccinate.

VII. SOUTH-EASTERN DIVISION.

24. LINLITHGOW.

673 (1). WHITBURN.—Of the ten children "unaccounted for," in four cases the Parish Council refuse to prosecute on the ground of previous prosecution.

25. EDINBURGH.

680. CRANSTON.—The one child whose vaccination has been postponed has been suffering from some skin trouble.

VIII. SOUTHERN DIVISION.

31. DUMFRIES.

819. DORNOCH.—In the case "unaccounted for," the father has been prosecuted by order of the Parish Council.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
	2. Orkney.	
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews and Deerness.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
25	St Andrews	Part of St Andrews and Deerness.
26	Sanday	Lady, and part of Cross and Burness.
	3. Caithness.	
37*b*	Keiss	Parts of Canisbay and Wick.
	5. Ross and Cromarty.	
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59*b*	Carnoch	Parts of Contin and Urray.
86*b*	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
	6. Inverness.	
92*b*	Cannich	Parts of Kilmorack and Kiltarlity.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
	8. Elgin.	
135	Elgin	Elgin, and parts of New Spynie and St Andrews-Lhanbryde.
	9. Banff.	
152	Enzie	Parts of Bellie and Rathven.
155*b*	Glenrinnes	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
	10. Aberdeen.	
171*b*	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210*b*	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick.
222*b*	Millbrex	Parts of Fyvie and Monquhitter.
227*b*	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237*b*	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249*b*	Ythan Wells	Parts of Auchterless and Forgue.
	11. Kincardine.	
266	Nigg	Nigg, and part of Aberdeen.
	12. Forfar.	
282	Dundee	Dundee Combination, and part of Mains and Strathmartine.
294*b*	Kilry	Parts of Glenisla and Lintrathen.
	13. Perth.	
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhidder	Balquhidder, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355*b*	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386*b*	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393*b*	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394*b*	Strathfillan	Part of Killin.
394*c*	Tenandry	Parts of Blair-Athol and Moulin.
	14. Fife.	
402	Anstruther-Easter	Anstruther-Easter, and part of Kilrenny.
417	Crail	Part of Crail and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457*b*	Thornton	Part of Kirkcaldy and Dysart and of Markinch.
	17. Stirling.	
473	Bonnybridge	Parts of Denny, Dunipace, and Falkirk.
488	St Ninians	Parts of St Ninians and Stirling.
490	Stirling	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
	18. Dumbarton.	
496	Dumbarton	Dumbarton, and parts of Cardross and Old Kilpatrick.
	19. Argyll.	
504	Ardchattan	Part of Ardchattan and Muckairn.
505	Ardnamurchan	(1) Parts of Ardnamurchan and of Arisaig and Moidart.
506	Ballachulish, etc. . .	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard .	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. . . .	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie	Parts of Kilmallie and Ardgour.
525	Lismore	Lismore and Appin, and part of Ardgour.
526	Lochgilphead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardchattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow) .	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelvie	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
	20. Bute.	
556	Lochranza	Parts of Kilbride and Kilmory.
	21. Renfrew.	
559*b*	Bridge-of-Weir	Parts of Houston and Killellan, and of Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
	22. Ayr.	
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578(3)	Alloway	Parts of Ayr and Maybole.
584*b*	Crosshill	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
603	Loudoun (Darvel district)	Parts of Loudoun and Galston.
610*b*	Patna	Parts of Dalmellington, Dalrymple, Kirkmichael, and Straiton.
	23. Lanark.	
622	Barony	Part of Glasgow.
626*a*	Cadder (Eastern district) .	Parts of Cadder and Glasgow.
626*b*	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	Parts of Glasgow and Govan Combination.
	25. Edinburgh.	
695*b*	New Craighall	Parts of Inveresk and Liberton.
698*b*	Stobhill	Parts of Borthwick, Cockpen, and Newbattle.
	29. Selkirk.	
774*a*	Caddonfoot	Caddonfoot, and part of Innerleithen.
	30. Roxburgh.	
787*b*	Edgerston	Parts of Jedburgh and Southdean.
	31. Dumfries.	
813*b*	Brydekirk	Parts of Annan, Cummertrees, and Hoddom.
830	Holywood	Holywood, and part of Terregles.
853*b*	Wanlockhead	Part of Sanquhar.
	32. Kirkcudbright.	
857*b*	Bargrennan	Parts of Minnigaff and Penninghame.
862	Corsockbridge	Parts of Balmaclellan, Kirkpatrick-Durham, and Parton.
864	Dalbeattie	Part of Urr.
	33. Wigtown.	
899	Stranraer	Stranraer, and parts of Inch and Leswalt.

LIST of REGISTRATION DISTRICTS which include BURGHS, or TOWNS of 2000 Inhabitants and upwards, *or parts thereof*, bearing a different name from the District in which they are situated.

No.	Registration Districts.	Burghs.	Towns.
80	Rosemarkie	*Fortrose.	
81	Rosskeen	*Invergordon.	
128[2]	Inverallan	*Grantown-on-Spey.	
130	Drainie	*Lossiemouth and Branderburgh.	
136	New Spynie	-	Elgin.
145	Aberlour	*Charleston of Aberlour.	
155a[2]	Macduff	Banff.	
161	Marnoch	*Aberchirder.	
162	Mortlach	*Dufftown.	
164	Rathven	*Buckie.	
167	Seafield	Cullen.	
201	Glenmuick, &c.	*Ballater.	
213	Kintore	Inverurie.	
226	Newhills	-	*Bucksburn.
231[1]	East Peterculter	Aberdeen.	
233	Pitsligo	*Rosehearty.	
254	Bervie	*Inverbervie.	
255	Dunnottar	Stonehaven.	
258[1]	Fetteresso	Stonehaven.	
266	Nigg	Aberdeen.

Cranston, . 680
Crathie, . 183
Crawford, . 635
Crawfordjohn, 636

* The actual number of Districts is 1075—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

Creich (Fife), 418
Creich (Sutherland), . 46
Crichton, . 681
Crieff, . 342
